PERFORMANCE
YOU CAN TRUST

Naadco Gly450 Isopropylamine salt Key to our Gly450

- Apply 98% of tech instead of 95%
- Designed for hard water environment
- Use Huntsman 3780 as build in surfactant
- Non-ionic surfactant
- Deionized water for making Gly450 for better performance
- Smaller molecule for better penetration of the wax layer
- Provide long lasting effect for better absorption

The efficacy of different formulations of glyphosate varies according to the quality and quantity of the product's in-built surfactant. When tough weeds are present, choosing the right product can greatly enhance the outcomes.

Results

Naadco Gly450 is non-selective herbicide for the control of many annual

and perennial weeds. Naadco Gly450 provides a non-residual, full knockdown

to a wide variety of weed species. It can be tank mixed with a range of other

products for complete control of weeds.

Why product choice matters

A key focus of Linertech is to assist growers in improving weed control so they can achieve better outcomes in the short and long-term.
